To: Ben Boswick <ben.boswick@gmail.com>, bjbosw@mts.net

Git and Other Commands for Ben

Git commands:

git status - List the status of the repo currently

git add <file name> - Add the file to the list of files staged for changes

git add -u - Add all newly updated files - Will not add new files that have not been added previously (must do a standard git add for that).

git commit -m "<Message>" - Self explanatory

git push - Push that bitch up

Other commands:

cd <folder> - Move into the folder (change directory)

ls - List all of the files in this folder

pwd - List the current path (Where are we in the file system currently?)

rm <file> - delete the given file

rm -r <folder> - delete the given folder

Git cheatsheet (more commands): <https://github.github.com/training-kit/downloads/github-git-cheat-sheet.pdf>

More Unix commands: <http://mally.stanford.edu/~sr/computing/basic-unix.html>
